### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Samuel G. Campbell III on 10/11/2010.

The application has been amended as follows:

172. (Currently Amended) A computer program product comprising:

a first set of instructions, executable on a computer system, configured to periodically communicate information regarding a configuration of a subsystem of a communications device, wherein said first set of instructions comprises a first subset of instructions, executable on said computer system, configured to periodically broadcast the information using a communications interface of the subsystem;

a second set of instructions, executable on said computer system, configured to determine the configuration;

a third set of instructions, executable on said computer system, configured to execute a logging process in a logging module of the communications device, wherein the logging process comprises the second set of instructions, and the subsystem comprises ~~[[a]]~~ the communications interface;

Art Unit: 2432

a fourth set of instructions, executable on said computer system, configured to execute a communications process in the communications interface according to a configuration of the communications interface; and

computer readable storage media, wherein said computer program product is encoded in said computer readable storage media.

174. (Currently Amended) The computer program product of claim 172, wherein said first set of instructions comprises:

a ~~first~~ second subset of instructions, executable on said computer system, configured to periodically broadcast the information to a security monitoring process executing on a security monitor communicatively coupled to the communications interface.

178. (Cancelled)

179. (Currently Amended) The computer program product of claim [[178]] 172, wherein said first subset of instructions comprises: a first sub-subset of instructions, executable on said computer system, configured to periodically broadcast the information to a security monitoring process executing on a security monitor coupled to the communications interface via a network.

2. The following is an examiner's statement of reasons for allowance. Independent claim 113 recites the features: the subsystem comprises a communications interface and the logging module is further configured to restrict a change to a configuration of

Art Unit: 2432

the logging module by the subsystem. Independent claim 131 recites the features: the subsystem comprises a communications interface and the periodically communicating comprises periodically broadcasting the information using the subsystem. Independent claim 158 recites the features: means for periodically communicating information regarding a configuration of the subsystem, wherein the means for periodically communicating information is coupled to the subsystem. Independent claim 172 recites the features: a first subset of instructions, executable on said computer system, configured to periodically broadcast the information using the communications interface. The closest prior art, Cleary et al. (US 5,504,905), discloses detecting a change in a configuration of a subsystem of a communication device and communicating information regarding the configuration of the subsystem (fig. 5); however, Clearly does not disclose the features listed above. The prior art, taken either singly or in combination, fails to anticipate or fairly suggest the limitations of applicant's independent claim, in such a manner that a rejection under 35 U.S.C 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
